

Rwanda Launches the CyberHub for Digital Excellence

On 2nd October, Rwanda's National Cyber Security Authority launched the CYBERHUB, Cybersecurity Centre of Excellence, at the College of Science & Technology Campus (UR-CST). The facility includes a Cybersecurity Academy, Innovation Hub, and advanced labs to support training, research, and innovation. The launch brought together government leaders led by the Ministry of ICT & Innovation & Ministry of Public Service and Labour, international partners and industry leaders like Cisco and GIZ, and private sector representatives.

Speakers emphasized the CyberHub's role in building digital resilience, creating jobs, and positioning Rwanda as a regional leader in cybersecurity. The centre aims to nurture talent, foster collaboration, and drive economic growth through strategic partnerships and cutting-edge education.

NCSA and partners conduct cybersecurity awareness for students

Throughout October, the cybersecurity awareness events empowered over 2,000 students across Rwanda with essential cybersecurity knowledge. Dubbed #BaMaso and #TekanaOnline, and led by the National Cyber Security Authority (NCSA) and partners, sessions at Green Hills Academy, RP Huye College, GS St Aloys Musanze I, and HVP Gatagara Rwamagana School covered topics like password protection, cyberbullying, data privacy, and responsible online behavior.

The campaign fostered open dialogue and practical learning, helping students become vigilant digital citizens. It emphasized inclusion, reaching youth with disabilities and students from diverse regions. Partners including RIB, NCDA, NCPD, REB, MTN Rwanda and Airtel Rwanda reinforced that cybersecurity is a shared responsibility.

Guinea's ARPT & Nigeria's NDPC delegations visited the DPO

we hosted delegations from Autorité de Régulation des Postes et Télécommunications (ARPT) of Guinea and Nigeria Data Protection Commission(NDPC) for an exchange on expertise sharing and potential collaboration.

Tool of the Month

Registration guide for both Data Controllers & Data processors

This guide helps applicants determine whether they are a Data Controller or Processor and outlines the registration and certification steps. Click [here](#) to access the guide.
